
The delta was one complex, not 3 units:
why not improve flood retention by reconnecting them?

Need and opportunity for responses

1. **Nagara Dam Committee:** good start!

2. **New management scope:** river basin(s)

From isolation to integration: mutual trust and outside facilitation

Joint planning principles: restore the river ecosystem and its functions

Open, creative thinking for real solutions

Increase public awareness and support

Prepare a **Governors Agreement of joint action** by related Prefectures

3. **New development needs**

— Improve the database: identify and fill in the gaps

— Involve competent expert (institutions) – local and international

— Add biologists to dam staff team

— Secure funding for planning: devote time and resources

— Commit to implement the agreed planning results

— **Test the opening of gates**

— **Verify water intake needs and options for alternative supply**
