

知事指定薬物一覧

	通称名	構造式等
1	2F-NENDCK, 2F-2OXO-PCE, 2-FXE, 2-fluorodeschloro- N-ethyl-ketamine	 <p>The structure shows a cyclohexane ring with a carbonyl group (=O) at the 2-position. At the 1-position, there is an ethylamino group (-NH-CH2-CH3) and a 2-fluorophenyl group (-C6H4-F).</p>
2	Metonitazepyne, N-Pyrrolidino Metonitazene	 <p>The structure features a benzimidazole ring system. At the 2-position of the benzimidazole, there is a 4-methoxyphenylmethyl group (-CH2-C6H4-OMe). At the 4-position, there is a 2-(pyrrolidin-1-yl)ethyl group (-CH2-CH2-N-pyrrolidine). A nitro group (-NO2) is attached to the benzene ring at the 6-position.</p>
3	1cP-AL-LAD	 <p>The structure is a complex pentacyclic system. It includes a tropane-like bicyclic core (8-azabicyclo[2.2.1]heptane) fused to a benzene ring. A cyclopropylmethyl group is attached to the nitrogen of the tropane ring. The tropane nitrogen is substituted with an ethyl group. The tropane ring is further substituted with a propyl group and a carbonyl group (-C(=O)-N(CH2CH3)2).</p>
4	1cP-MiPLA, 1cP-MIPLA	 <p>The structure is similar to 1cP-AL-LAD, featuring the same tropane-benzene core and cyclopropylmethyl group. However, the tropane nitrogen is substituted with a methyl group instead of an ethyl group. The tropane ring is also substituted with a propyl group and a carbonyl group (-C(=O)-N(CH3)2).</p>
