

Overview of “Knowledge Hub Aichi”

1. Overview

“Knowledge Hub Aichi” is an R&D center established by Aichi Prefecture Government on the site of the former Expo 2005 Aichi site in order to support high-value-added manufacturing.

This “Knowledge Hub Aichi” provides joint research through industry-academia-administrative collaboration that bridges the research seeds of universities and other institutions to the product development by companies as soon as possible, as well as technological development support that meets the technological needs of industry.

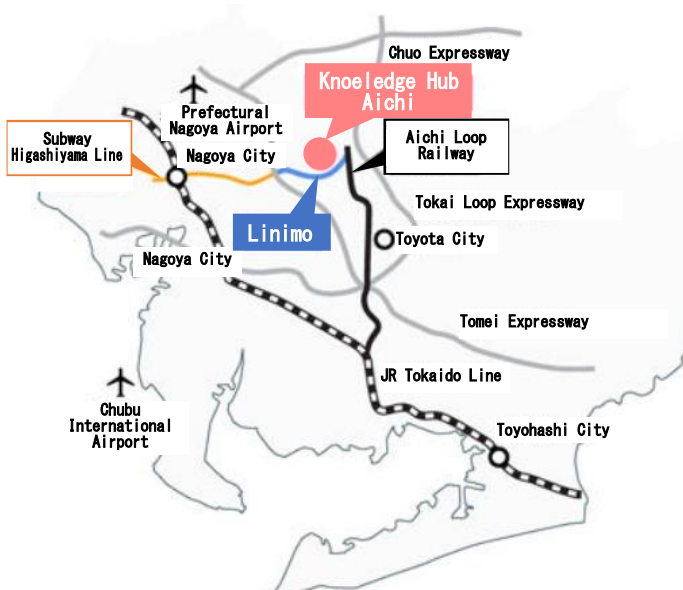

In addition, in order to solve problems at corporate product development and production sites, we conduct tests and analyses using state-of-the-art synchrotron optical utilization facilities and advanced measurement and analysis equipment, and provide technical support to local manufacturing companies by consulting on various technical issues.

In addition, we supports companies’ efforts to promote the practical application of related technologies in the fields of growing next-generation industry by providing that Empirical Research Area.

2. Location

1267-1 Yagusa-cho Aikai, Toyota City, Aichi Prefecture, Japan

3. Access

By public transport

 Nagoya Station - Subway “Fujigaoka” - Linimo “Tojishiryokan-Minami”
59min from Nagoya Station

By car

 Tomei Expressway: Nisshin JCT ~ Nagoyaseto Expressway: Nagakute IC
from where 3km east

 Tokai Loop Expressway: ToyotaFujioka IC ~ Snage Green Road: Ygusa IC
from where about 800m west
